

IN HARMONY

Recovery from Tinnitus

We are hiring:

Full-Stack App-Developer (m/f/d) – Flutter

– Full-time and permanent, starting end of 2020.

With *In Harmony*, people who suffer from tinnitus can finally take a sigh of relief. Our medical cross-platform app embeds the tinnitus phantom noise harmoniously in music and can be used by patients on their own. Our vision statement includes research, development and distribution of technical solutions to improve wellbeing and quality of life. Let's work together to help people. Become part of our innovative start-up, Tech & Life Solutions GmbH.

Your field of work

- App development, prototype porting and extension by new features
- Design, development, evaluation und maintenance according to IEC 62304
- Documentation of requirements, architecture, designs, verification & validation

You are

- A passionate and experienced app developer in Flutter (or similar, e.g. React Native)
- Fundamentally familiar with C++ (audio backend)
- Confident in software development with OOD, TDD and Scrum workflow
- Good at working with tools such as Git, JIRA, Confluence or comparable tools
- Willing to familiarize yourself with the topic of digital health, esp. medical software
- User-focused, creative, willing to learn, pragmatic, proactive, a good team player
- You have good German and English skills

We offer

- Flexible working hours, permanent position
- Active design options and opportunity to grow professionally in our ambitious start-up
- Qualification opportunities (e.g. safety officer or quality management representative)
- A demanding task field and a content-related key role in our team
- Agile workflow, flat hierarchy, open communication
- Opportunity to participate in the success of our start-up (employee stock ownership)

We look forward to

- Getting to know you
- A few lines about you, what is particularly important to you in life, and your goals
- Your CV / your social network profile / your GitHub profile / your references
